Total Loss Damage Assessment Report

Repair Summary

Having examined the damage as presented, we have estimated repair times and methods, which are detailed below. We would recommend the vehicle to be dealt with on a total loss basis. The damage sustained to the vehicle would render the salvage as category 'N' (non structural damage) in accordance with the [Salvage Code Of Practice](#).

We are not aware of any outstanding recovery or storage charges.

We would suggest settlement be sought at a net figure of £7,195.44, being the pre-accident value, less the anticipated salvage value.

The [salvage](#) should be disposed of in accordance with the Code of Practice for the disposal of motor vehicle [salvage](#) produced by the ABI and the vehicle listed on [MIAFTR](#).

Alternatively, the vehicle can be returned to use if repaired to a safe and legal standard, and capable of passing a MOT test thereafter.

As the inspected vehicle is unroadworthy or undriveable and considered beyond economical repair, in order to prevent any issues with safety, legislation, insurance or DVLA, we suggest it should be moved to safe storage.

The salvage has been reviewed by an AQP

Data

We have used [Glass's](#) and [Cazana](#) guides and adverts from sites such as AutoTrader to assist with the valuation of the vehicle and have assumed the mileage reading displayed on the odometer is accurate and the vehicle has its appropriate documentation such as service history & MOT test certificate where applicable.

In order to mitigate losses we have carried out a basic inspection dealing with the vehicle's damaged area; we are happy to accept further instructions to confirm the identity, condition or roadworthiness of the remainder of the vehicle.
